Financial Document Scope

Finaira Privacy Gateway project, October 2026

How to use this document

This document describes the financial documents the privacy gateway is designed to handle: what each one is used for, what it looks like, which languages and number formats it uses, how it is usually stored or sent, how much of it is normally handwritten, and which sensitive information it contains.

It has five parts:

1. **Overview.** Every document type on one page, with its scope level.
2. **Documents with public samples.** Types for which we collected real blank documents from Egyptian banks. Each comes with a picture of a real page.
3. **Other common documents.** Types for which no public blank sample exists. Each comes with a simple drawn example made from invented data.
4. **Formats and languages.** A short reference on file formats and language patterns.
5. **Sample collection and references.** The list of collected documents and the sources used.

Scope levels. *Main scope*: the first documents the gateway is built and tested on. *Extended scope*: added next. *Reference*: used to check that ordinary text is not hidden by mistake. *Later*: possible future work. *Not included*: outside the project. The scope may change as the project develops.

Sensitive information. The priority labels (P0, P1, P2, Keep) follow the companion document *Financial Data Protection Rules and Sensitive Information List*, which gives the law behind each one. P0 must never leave the organization in readable form; P1 is hidden by default; P2 is hidden when it could identify someone together with other details; Keep stays visible.

Examples. Pictures in Part 2 are pages of public blank documents taken from the banks' own websites; they contain no customer data. Examples in Part 3 are drawings made for this document; every name and number in them is invented.

Part 1. Overview

Document type	Kind	Language	Usual format	Handwriting	Sensitivity	Scope
Account opening and customer identification (KYC) forms	Fill in form	Some banks print the form only in Arabic, written right to left, with a single field for the name in English	Paper form filled by hand, then scanned; online forms	Mostly handwritten	Very high	Main scope
Loan and credit agreements and applications	Contract and application form	About half Arabic and half English	Printed contract, signed, then scanned	Partly handwritten	Very high	Main scope
Money transfer and transaction instructions	Transaction form or online banking screen	Online banking guides for Egyptian customers are in Arabic	System generated confirmation; paper form scanned	Varies	Very high	Main scope
Card, dispute and service request forms	Short request form with free text	Arabic and English labels on the same line	Paper or fillable PDF, scanned or emailed	Mostly handwritten	High	Main scope
Bank account statements	Supporting document	Arabic, English or both in the header	Digital PDF or spreadsheet; printed and stamped copies	Stamp and signature only	Very high	Main scope

Salary certificates and employer letters	Supporting document	Mostly Arabic; multinational employers use English	Stamped paper letter, scanned	Signature only, sometimes partly	Very high	Main scope
National ID card copies	Supporting document	Arabic only	Photocopy or phone photo	None on the card	Very high	Extended scope
Utility bills as proof of address	Supporting document	Arabic	Paper bill, photocopied or photographed	None	Medium	Extended scope
Credit bureau reports (iScore)	Supporting document	Arabic and English	Digital PDF	None	Very high	Extended scope
Customer complaints and correspondence	Free text	Mostly Arabic, often in Egyptian colloquial Arabic, with English banking words mixed in	Email, web form, chat, scanned letter	Varies	High	Extended scope
Terms and conditions and key facts statements	Long legal text	English, Arabic, or both side by side	Digital PDF	Signature only	Low	Reference
Fee tables, rates, limits and guides	Tables and information sheets	Almost all English	Digital PDF	None	None	Reference
Trade finance: letters of credit and guarantees	Long application form	Arabic and English	Portal, paper form, SWIFT message	Signature only	Medium	Later
Tax invoices and electronic receipts	Supporting document	Arabic and English	JSON with PDF or printed copy	None	Medium	Later
Commercial register extracts and tax cards	Supporting document	Arabic	Official paper, scanned	Stamp and signature only	Medium	Later
Call center transcripts	Free text	Mostly Egyptian colloquial Arabic, with English words mixed into sentences	Text from speech recognition	None	High	Later
Payroll files	Supporting document	English column headings with Arabic names	Spreadsheet or text file	None	Very high	Later
Published financial reports	Audited statements	English or Arabic	Digital or scanned PDF	Signature only	None	Not included
Insurance claims	Supporting document	Arabic and English, with English medical terms	Scans, photos, handwriting	Mostly handwritten	Very high	Not included

Part 2. Documents with public samples

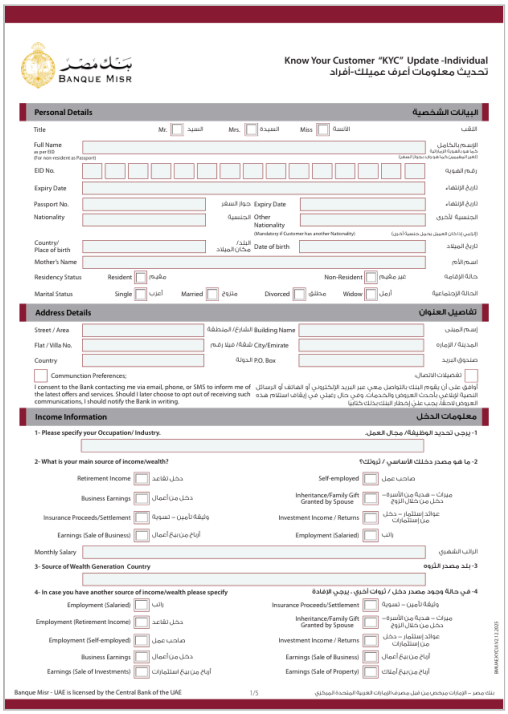

These document types are published by Egyptian banks as blank forms or as information documents. The pictures are real pages.

Account opening and customer identification (KYC) forms

طلب فتح حساب للأفراد لعميل جديد

National Bank of Egypt, account opening form for individuals (Arabic)

Know Your Customer "KYC" Update -Individual
تحديث معلومات اعرف عميلك-أفراد

Banque Misr UAE, KYC update form for individuals (Arabic and English)

Scope	Main scope
Sensitivity	Very high
Kind	Fill in form
How it looks	One or two dense pages of labelled fields, often followed by several pages of terms. Shaded bars divide the sections: personal details, contact details, employment and income, declarations, joint holders. Blanks are dotted lines or boxes, categories are tick boxes (income band, housing, residency, education), the ID number sits in one box per digit, and the page ends with a signature area and a strip for bank use.
Language	Some banks print the form only in Arabic, written right to left, with a single field for the name in English. Others print every label twice, Arabic on the right and English on the left of the same line.
Numbers	Printed labels use Western digits. Values filled in by hand are often written in Arabic Indic digits (٠١٢٣).
How it is stored and sent	Banks publish blank forms as digital PDFs. Filled forms are printed, completed by hand with a pen, signed, stamped by the branch and then scanned or photographed. Online onboarding uses web or app forms with a live photo of the ID.
Handwriting in normal use	The form is printed; in normal use almost every value is written in by hand with a pen (names, ID number, address, phone, ticks), then signed. Forms filled online are fully typed.
Sensitive information	Full name in Arabic and in Latin letters (P0) National ID or passport number (P0) Customer number (CIF) (P0) Address, phones, email (P0) Income band and sources of income (P0) Disability status (P0) Joint holders and their customer numbers (P0) Birth date and place, ID issue and expiry dates (P1) Employer, job title (P1) Politically exposed person answer (P1) Gender, nationality, marital status, education, housing (P2)
Difficult cases	Many short fields with little context; tick boxes only mean something next to their label; the ID number is split into separate boxes; forms for minors (all data about children is sensitive).
Samples collected	11

Loan and credit agreements and applications

البنك الأهلي المصري
NATIONAL BANK OF EGYPT

Personal Cash Loan in EGP against "Al Ahly Plus Certificate" Agreement

عقد تمويل شخصي نقدي بالجنيه المصري بضمان شهادة "الأهلي بلس"

اسم العميل: _____

توقيع العميل: _____

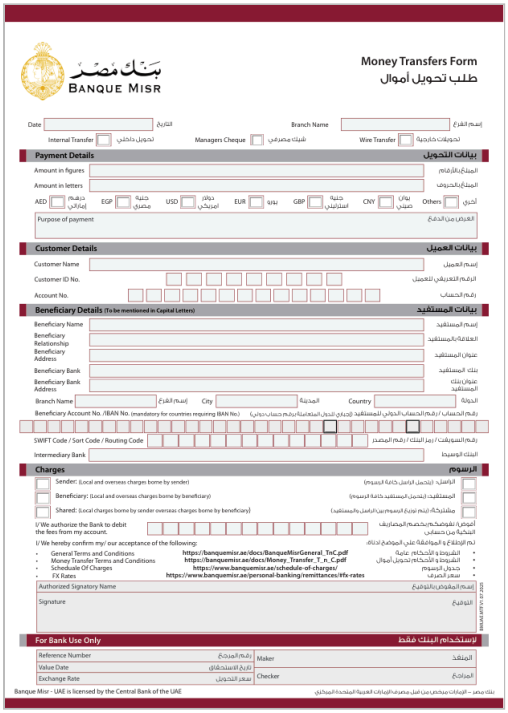

National Bank of Egypt, personal cash loan agreement (Arabic and English columns)

Scope	Main scope
Sensitivity	Very high
Kind	Contract and application form
How it looks	A long contract in two columns: English on the left, Arabic on the right, the same clause side by side. The opening block names the parties, with blanks for the date, the bank representative, the branch manager, the borrower, the address and the ID number. Then come a preamble and numbered articles, with blanks inside the sentences for amounts, certificate numbers and dates. The customer name and signature repeat in the footer of every page.
Language	About half Arabic and half English. Formal legal Arabic and formal legal English.
Numbers	Amounts appear in digits and again written out in words; dates are often split into three blanks for day, month and year.
How it is stored and sent	Printed by the bank's loan system, partly filled by hand, signed on every page, sometimes thumbprinted or notarised, then archived as a scanned multipage file.
Handwriting in normal use	The contract text is printed. The blanks (names, ID number, amounts, dates) are either printed by the bank's system or filled in by hand. Every page carries handwritten signatures, sometimes a thumbprint.
Sensitive information	Borrower name and ID number (P0) Loan amount, instalments, term (P0) Loan account and certificate numbers (P0) Collateral and guarantor details (P0) Other debts declared by the customer (P0) Bank staff names (P1) Address (P0)
Difficult cases	Personal data sits inside sentences rather than in labelled fields; the same value appears in both language columns; a number after the word رقم is an identifier while a number after جنيه is an amount.
Samples collected	7

Money transfer and transaction instructions

Banque Misr online banking guide, transfer screen (Arabic)

Banque Misr UAE, money transfer form (Arabic and English)

Scope	Main scope
Sensitivity	Very high
Kind	Transaction form or online banking screen
How it looks	Two kinds. Online banking screens are web panels with drop down lists for the source account, beneficiary, frequency, dates and amount, plus a notes box. Paper transfer forms have blocks for payment details, customer details and beneficiary details (name, address, bank, IBAN in boxes, SWIFT code), tick boxes for who pays the charges, a signature and a strip for bank use.
Language	Online banking guides for Egyptian customers are in Arabic. Paper forms are printed in both languages.
Numbers	Western digits on screens; amounts in figures and in words on paper forms; dates as day, month, year.
How it is stored and sent	In practice these exist as transfer confirmations generated by the bank's systems, SWIFT messages, or paper forms scanned at the branch.
Handwriting in normal use	Online confirmations and system records contain no handwriting. Paper transfer forms are filled in by hand, usually in capital letters, and signed.
Sensitive information	Source and beneficiary account numbers and IBAN (P0) Card number (P0) Beneficiary name, address and bank (P0) Amount, currency, date (P0) Purpose of the transfer (P0) Signatory name (P0)
Difficult cases	The beneficiary is a third person whose data is also protected; IBAN and card numbers carry check digits, which makes them easy to confirm.
Samples collected	6

Card, dispute and service request forms

HSBC Egypt, cardholder dispute form (Arabic and English)

Scope	Main scope
Sensitivity	High
Kind	Short request form with free text
How it looks	One to four pages: rows for card and account numbers, a small table of disputed transactions (date, merchant, amount), many tick boxes for the reason, a free text remarks area, declarations, contact details and a signature.
Language	Arabic and English labels on the same line.
Numbers	Western digits in tables.
How it is stored and sent	Filled by hand at the branch or typed into a fillable PDF, then scanned or emailed.
Handwriting in normal use	Printed form filled in by hand, including a handwritten description of the problem, and signed. Fillable PDF versions may be typed.
Sensitive information	Card and account numbers (P0) Cardholder name, phone, email, address (P0) Transaction amounts, dates, merchants (P0) Free text description of the problem (P0)
Difficult cases	The free text area can contain anything, including other people's names and numbers.
Samples collected	6

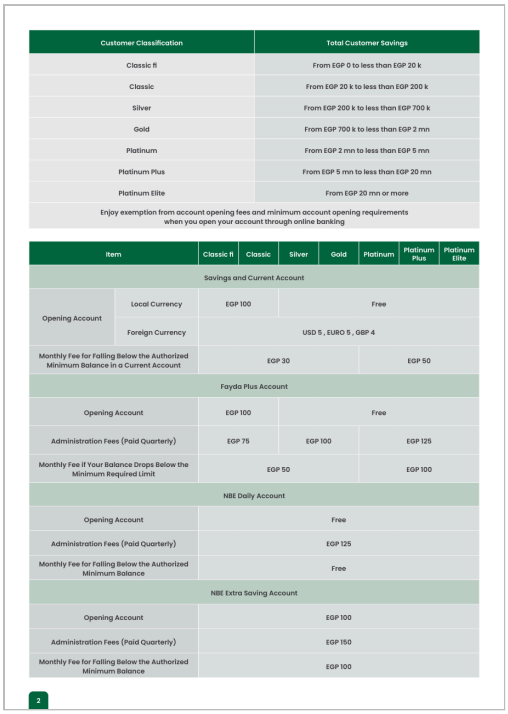

Terms and conditions and key facts statements

Banque du Caire, QCash wallet terms (Arabic)

Scope	Reference
Sensitivity	Low
Kind	Long legal text
How it looks	Pages of numbered clauses, sometimes in two columns, with almost no blanks. Some general terms booklets run to about 100 pages.
Language	English, Arabic, or both side by side. Formal legal language.
Numbers	Mostly Western digits for fees and percentages.
How it is stored and sent	Digital PDFs published by the bank; the customer signs the last page, which is then scanned.
Handwriting in normal use	Fully printed. Only the customer's name, date and signature on the acceptance page are handwritten.
Sensitive information	Customer name and signature on the acceptance page (P0)
Difficult cases	Useful for checking that bank names, clause numbers and fees are not hidden by mistake.
Samples collected	11

Fee tables, rates, limits and guides

Customer Classification	Total Customer Savings

Published financial reports

Translation of financial statements
Originally issued in Arabic

National Bank of Egypt
Notes to the separate financial statements for the year ended 30 Jun 2020 — All figures are in EGP Millions

1. General

National Bank of Egypt (S.A.E) was established as a commercial bank on 25/6/1898 and operates in conformity with Law No. 88 for 2003 in Arab Republic of Egypt and head office is located in Cairo.

National Bank of Egypt (S.A.E) provides retail, corporate and investment banking services in Arab Republic of Egypt through its head office in Cairo and (517) branches, domestic financial units, representative offices in Johannesburg (South Africa), Dubai (United Arab of Emirates) and Addis Ababa (Ethiopia) and through branches in New York (United States), Shanghai (China). The bank has 21702 employees at June 30, 2020.

2. Summary of significant accounting policies

2.1- Basis of preparation of the separate financial statements

These separate financial statements have been prepared in accordance with the instructions of the Central Bank of Egypt (CBE) rules approved by its Board of Directors on December 16, 2008; and as per IFRS 9 "Financial Instruments" in accordance with the instructions of the Central Bank of Egypt (CBE) dated February 26, 2019.

The financial statements at June 30, 2019 have been prepared in accordance with the instructions of the Central Bank of Egypt (CBE) rules approved by its Board of Directors on December 16, 2008 and starting from July 01, 2019, the financial statements have been prepared according to Central Bank of Egypt (CBE) instructions dated February 26, 2019 to prepare financial statements according to IFRS 9 "Financial Instruments".

Accordingly, management amended the accounting policies to comply with the adoption of mentioned instructions, the following disclosure describes the changes in accounting policies:

The Bank initially applied IFRS 9 "Financial Instruments" issued on July 2014 starting from July 01, 2019 and as a trial implementation throughout 2018 ,however the actual implementation will be starting from July 01,2019. The standard requirement substantially differ from the previously applied standard in the classification , measurement and disclosers of some financial assets and liabilities.

Classification of financial assets and financial liabilities:

At initial recognition, financial assets have been classified and measured according to amortized cost, fair value through other comprehensive income (FVTOCI) and fair value through profit or loss (FVTPL).

- The financial assets have been classified according to how they are managed (the entity's business model) and their contractual cash flow characteristics.
- The financial assets are measured at amortized cost if it is not measured at fair value through the profit or loss and if the following two conditions met:
  a) The management's intention is to maintain the asset in the business model to collect contractual cash flows and;
  b) The contractual conditions of the financial assets will build cash flows in certain dates which are limited only on payment of principal and interest (SPPI).
- The Bank may choose without recourse to measure equity investments which are not classified as a trading investment at fair value through other comprehensive income at initial recognition. This choice will be made per each investment.
- All other financial assets will be classified at fair value through profit or loss

In addition to that, the bank may choose without recourse a financial asset to be measured at amortized cost or fair value through other comprehensive income to be measured at fair value through the profit or loss in the initial recognition, and in such a case that this reclassification will lead to prevent an accounting mismatch.

2.1.1-Business model assessment:

The Bank makes an assessment of the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

a) The stated policies and objectives for the portfolio and the operation of those policies in practice, especially to know whether these management policies concentrate to gain the contractual interest or reconcile financial assets period with financial liabilities period which finance these assets or target cash flow from selling the assets;
b) How the performance of the portfolio is evaluated and reported to the Bank's management;
c) The risks that affect the performance of the business model and the financial assets held within that business model and how those risks are managed;

The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. Meanwhile the bank did not rely only on information related to sales activity separately, but taking into consideration overall assessment on how achieving the goal that was announced by the bank to manage financial assets and how to achieve cash flow.

11

Scope	Not included
Sensitivity	None
Kind	Audited statements
How it looks	Dozens of pages of notes and tables.
Language	English or Arabic.
Numbers	Western digits in tables.
How it is stored and sent	Digital or scanned PDF; often needs OCR.
Handwriting in normal use	Fully printed. Only the auditor's signature and stamp.
Sensitive information	Names of auditors and board members only (Keep)
Difficult cases	Little personal data.
Samples collected	1

National Bank of Egypt, notes to the financial statements

Part 3. Other common documents

These documents are handled every day by banks and finance companies in Egypt but are not published as blank samples, because they are generated for a specific customer. The descriptions come from bank requirements, regulators and industry sources listed in Part 5. The drawn examples show the typical layout only; all names and numbers in them are invented.

Bank account statements

[Bank name] Account statement / كشف حساب

Customer: Ahmed Mahmoud Ali Hassan
Address: 12 El Tahrir St, Dokki, Giza
Account no.: 1002 3456 7890 123 Currency: EGP
IBAN: EG38 0019 0005 0000 0000 2631 8000 2
Period: 01/08/2026 to 31/08/2026

Date	Description	Debit	Credit	Balance
01/08	Opening balance			18,450.00
03/08	SALARY AUG / راتب		21,000.00	39,450.00
05/08	POS CARREFOUR MAADI 4532****1029	1,236.50		38,213.50
09/08	INSTAPAY TO Mona Samir 010xxxxxx45	3,000.00		35,213.50

Branch stamp and signature

Drawn example, invented data

Scope	Main scope
Sensitivity	Very high
What it is used for	Required for loans (often the last six months, stamped by the branch), for visa applications, and for proving income of self employed customers.
How it looks	A header with the bank logo, customer name and address, account number, IBAN, currency and period; then a table of transactions with date, description, debit, credit and running balance; totals at the end, and a branch stamp on printed copies.
Language	Arabic, English or both in the header. Transaction descriptions are usually short English codes, mixed with Arabic names of people and shops.
Numbers	Western digits; amounts with thousands separators.
How it is stored and sent	Generated by the bank as a digital PDF or a spreadsheet; customers also print, stamp and rescan them.
Handwriting in normal use	Fully printed by the bank's system. Certified copies carry a branch stamp and an employee's handwritten signature.
Sensitive information	Customer name, address (P0) Account number, IBAN, card numbers in descriptions (P0) Balances and every transaction amount (P0) Names and phone numbers of transfer counterparties (P0) Salary and employer name in descriptions (P0)
Difficult cases	Hundreds of short lines; personal data hides inside the description column; the totals must stay consistent after amounts are hidden or changed.

Back: المهنة: مهندس | النوع: ذكر | الديانة: ... | الحالة الاجتماعية: متزوج
تاريخ الإصدار، جهة الإصدار، البطاقة سارية حتى

Drawn example, invented data

Scope	Extended scope
Sensitivity	Very high
What it is used for	Attached to almost every banking and finance application.
How it looks	A photocopy or phone photo of both sides of the card. The front shows the photo, the name over two lines, the address and the 14 digit national number. The back shows profession, gender, religion, marital status, the issue date and office, and the expiry date.
Language	Arabic only.
Numbers	Arabic Indic digits.
How it is stored and sent	Paper photocopy that is scanned, or a phone photo. Reading it needs OCR.
Handwriting in normal use	The card is fully printed. Banks often ask the customer to write 'true copy' and sign on the photocopy.
Sensitive information	Photo (P0) Name, address, national number (P0) Religion (P0) Profession, marital status, gender (P1 and P2) Issue and expiry dates (P1)
Difficult cases	Image only; Arabic Indic digits; religion is printed on the card, which makes the copy sensitive data on its own.

Salary certificates and employer letters

[اسم الشركة] إدارة الموارد البشرية

شهادة مفردات مرتب

تشهد الشركة بأن السيد/ أحمد محمود علي حسن، رقم قومي ٢٩٠٠١٠١٠١٢٣٤٥٦، يعمل لديها بوظيفة مهندس تخطيط منذ ٠١/٠٣/٢٠١٨، وأن مرتبه الشهري كالتالي:

الأساسي: ٩٬٠٠٠ الحوافز: ٧٬٥٠٠ البدلات: ٤٬٥٠٠ الإجمالي: ٢١٬٠٠٠ جنيه

الاستقطاعات (تأمينات وضرائب): ٣٬٢٠٠ الصافي: ١٧٬٨٠٠ جنيه

وقد أعطيت له هذه الشهادة بناء على طلبه لتقديمها إلى [اسم البنك].

Stamp and HR signature

Drawn example, invented data

Scope	Main scope
Sensitivity	Very high
What it is used for	Proof of income for loans and credit cards when the salary is not paid into the same bank; an employer undertaking is often attached.
How it looks	One page on the employer's letterhead, addressed to the bank. A short paragraph states the employee's name, national number, job title and start date, followed by the salary broken into basic pay, allowances, deductions and net pay. It ends with the company stamp and the signature of the human resources manager.
Language	Mostly Arabic; multinational employers use English.
Numbers	Arabic Indic or Western digits.
How it is stored and sent	Printed, stamped and signed; submitted as paper or a scan.
Handwriting in normal use	Usually typed on the employer's letterhead, then stamped and signed by hand. Small employers sometimes fill in a preprinted letter by hand.
Sensitive information	Employee name and national number (P0) Salary, allowances, deductions (P0) Job title, start date, employer (P1)
Difficult cases	Free text paragraph rather than fields; the stamp often covers part of the text.

العنوان: ١٢ شارع التحرير، الدقي، الجيزة

رقم الحساب: ٤٥٦٧٨٩١٢٣ رقم العداد: ٨٨٢٣٤١

الاستهلاك: ٣١٢ ك.و.س الفترة: أغسطس ٢٠٢٦

المبلغ المستحق: ٤١٨٫٧٥ جنيه

Drawn example, invented data

Scope	Extended scope
Sensitivity	Medium
What it is used for	Proof of residence for opening accounts and for loans.
How it looks	A small printed bill from the electricity, gas, water or telephone company, with the subscriber name, address, account and meter numbers, consumption, period and amount due.
Language	Arabic.
Numbers	Arabic Indic or Western digits.
How it is stored and sent	Paper bill that is photocopied or photographed; some companies offer digital bills.
Handwriting in normal use	Fully printed by the utility company.
Sensitive information	Subscriber name and address (P0) Subscriber account and meter numbers (P1) Consumption and amount (P2)
Difficult cases	The subscriber is often a relative or the landlord, not the customer.

Credit bureau reports (iScore)

No example drawn

Scope	Extended scope
Sensitivity	Very high
What it is used for	Pulled by banks and finance companies before approving any credit. Customers can now get their own report through the Digital Egypt platform.
How it looks	A multi page report with the person's identification details, a credit score, a list of all credit facilities (lender, type, limit, balance, monthly instalment), the payment history with any delays, and any legal actions or negative records.
Language	Arabic and English.
Numbers	Western digits.
How it is stored and sent	Digital PDF from the bureau's platform.
Handwriting in normal use	Fully digital.
Sensitive information	Name, national number, address (P0) Credit score, every facility, balances, delays (P0) Legal actions and negative records (P0)
Difficult cases	The whole report is financial data about one person; there is almost nothing that can stay visible except the bureau's own wording.

Tax invoices and electronic receipts

Tax invoice / فاتورة ضريبية

QR

Seller: [Company name], tax registration no. 123 456 789, activity code 4649
Buyer: [Company name], tax registration no. 987 654 321
Invoice no. INV 2026 0815 Date 15/08/2026
UUID: 7f3c9a1e...b42d

Item code	Description	Qty	Price	VAT 14%
EG 1234 5678	Printer toner	10	850.00	1,190.00

Total: 9,690.00 EGP

Drawn example, invented data

Scope	Later
Sensitivity	Medium
What it is used for	Sent between companies through the Egyptian Tax Authority's electronic invoicing system, and to consumers as electronic receipts. Processed in large volumes for accounting and audit.
How it looks	Seller and buyer details with their tax registration numbers, invoice number and date, a table of items with codes, quantities, prices and VAT, totals, a unique identifier issued by the Tax Authority and a QR code.
Language	Arabic and English.
Numbers	Western digits.
How it is stored and sent	Structured JSON sent to the Tax Authority, with a PDF or printed copy. Electronic receipts must carry the buyer's name and national number once one receipt reaches EGP 150,000.
Handwriting in normal use	Electronic invoices and receipts are fully digital. Small shops outside the electronic system may still use handwritten receipt books.
Sensitive information	Buyer name and national number on large consumer receipts (P0) Tax registration numbers of sole traders (P1) Company data on business invoices (Keep, unless the client is a bank customer)
Difficult cases	Most of the content is company data, so the privacy value is lower than for personal banking documents.

Commercial register extracts and tax cards

No example drawn

Scope	Later
Sensitivity	Medium
What it is used for	Required to open accounts and take loans for companies and sole traders.
How it looks	The commercial register extract shows the registration number and date, company name and type, registered address, activity, capital, branches, and the names, birth dates, nationalities and signing powers of partners and managers. The tax card shows the 9 digit tax registration number, the name, the activity and the tax office.
Language	Arabic.
Numbers	Arabic Indic or Western digits.
How it is stored and sent	Official paper documents that are scanned.
Handwriting in normal use	Printed official documents with official stamps and signatures. Older documents may have handwritten entries and notes.
Sensitive information	Names, birth dates and nationalities of partners and managers (P0 and P1) Registration and tax numbers of sole traders (P1) Company name, activity, capital (Keep)
Difficult cases	Mixes company data with personal data of the people behind the company.

Customer complaints and correspondence

From: ahmed.m.hassan@example.com To: complaints@[bank].com.eg

السلام عليكم، أنا أحمد محمود عميل في فرع الدقي، رقم الحساب ١٠٠٢٣٤٥٦٧٨٩٠. اتخصم مني ٣٠٠٠ جنيه يوم ٩ أغسطس على تحويل إنستاباي ماوصلش للمستلم. كلمت خدمة العملاء أكتر من مرة ومحدش رد. رقمي ٠١٠٠١٢٣٤٥٦٧ لو حد عايز يتواصل. شكرا

Drawn example, invented data

Scope	Extended scope
Sensitivity	High
What it is used for	Emails, web forms, chat messages and letters from customers. Banks must record and answer complaints under Central Bank consumer protection rules.
How it looks	Free text with no fixed layout, sometimes with an attached screenshot or photo.
Language	Mostly Arabic, often in Egyptian colloquial Arabic, with English banking words mixed in.
Numbers	Both digit types, sometimes in the same message.
How it is stored and sent	Email, web form, app chat; paper letters are scanned.
Handwriting in normal use	Emails, web forms and chats are typed. Complaint forms and letters handed in at a branch are often fully handwritten.
Sensitive information	Name, phone, email (P0) Account and card numbers written in the text (P0) Amounts and transaction details (P0) Names of other people involved (P0)
Difficult cases	No structure; colloquial spelling; numbers written in words or broken up.

Call center transcripts

Call 2026 08 10, 14:32, agent 0417

العميل: أيوه أنا عايز أعمل cancel للكارت عشان اتسرق
الموظف: ممكن الرقم القومي لو سمحت؟
العميل: اتنين تسعة صفر صفر واحد صفر واحد ...
الموظف: تمام، آخر أربع أرقام في الكارت؟
العميل: واحد صفر اتنين تسعة

Drawn example, invented data

Scope	Later
Sensitivity	High
What it is used for	Quality checks, complaints and fraud investigations.
How it looks	Speaker turns produced by speech recognition, with a time stamp and agent number.
Language	Mostly Egyptian colloquial Arabic, with English words mixed into sentences.
Numbers	Numbers are often spoken digit by digit and written out as words.
How it is stored and sent	Text or JSON produced from recordings.
Handwriting in normal use	Produced by machine from recordings.
Sensitive information	Name, national number and card digits spoken aloud (P0) Phone numbers, addresses (P0) Voice recording itself (P0)
Difficult cases	Numbers spread across several words or turns; speech recognition errors.

Payroll files

Payroll transfer file, August 2026 Company: [Company name], account 1002 9988 7766

Emp. no.	Name	National ID	Account / IBAN	Net salary
0153	أحمد محمود علي	29001010123456	EG38 0019 … 8000 2	17,800.00
0154	منى سمير عبد الله	29505120198765	EG12 0003 … 4471 9	12,350.00

Drawn example, invented data

Scope	Later
Sensitivity	Very high
What it is used for	Sent by employers to their bank each month to pay salaries.
How it looks	A spreadsheet or fixed format text file with one row per employee: employee number, name, national number, account or IBAN, net salary.
Language	English column headings with Arabic names.
Numbers	Western digits.
How it is stored and sent	Spreadsheet or text file uploaded to the bank's corporate portal.
Handwriting in normal use	Fully digital files.
Sensitive information	Employee names and national numbers (P0) Accounts and IBANs (P0) Salaries (P0)
Difficult cases	Every row is a different person, so one file holds data on hundreds of people.

Insurance claims

No example drawn

Scope	Not included
Sensitivity	Very high
What it is used for	Medical, motor and property claims handled by insurers and third party administrators.
How it looks	Claim forms with handwritten descriptions, medical reports, hospital invoices, photos and police reports.
Language	Arabic and English, with English medical terms.
Numbers	Both types.
How it is stored and sent	Scans, photos and handwriting.
Handwriting in normal use	Claim forms, accident descriptions and doctors' notes are often handwritten, with stamps from hospitals and workshops.
Sensitive information	Health data and diagnoses (P0) Name, national number, policy number (P0) Settlement amounts (P0)
Difficult cases	Health data plus handwriting; outside the banking focus of the project.

Part 4. Formats and languages

File formats

Format	How the text is read	Typical documents	Handled by the gateway
Digital PDF with a clean text layer	Read directly	Fee tables, English contracts, statements	Yes
Digital PDF where Arabic text comes out with errors (letters swapped or in display forms, labels in two languages joined together)	Read directly, then corrected	Many Egyptian bank forms and contracts	Yes
Fillable PDF form	Field values and field names read directly	Application and KYC forms	Yes
Spreadsheet, JSON or text file	Read directly	Statements, payroll files, electronic invoices, SWIFT messages	Extended scope
Email and chat text	Read directly	Complaints and correspondence	Extended scope
Scanned paper, filled by hand, stamped	OCR and handwriting recognition	Filled forms, signed contracts, salary certificates	Later
Phone photo	OCR, after correcting angle and blur	ID card copies, utility bills, receipts	Later
Speech recording	Speech recognition	Call center calls	Later

Language patterns

Pattern	Where it appears	What it means for the gateway
Arabic only, written right to left	Many Egyptian forms, ID cards, salary certificates, utility bills	Arabic name and number recognition; correcting letter errors in extracted text
Same text in two columns, Arabic and English	Contracts and loan agreements	The same value appears twice and must be replaced in the same way both times

Arabic and English labels on one line	Bilingual application forms	Labels can run together when text is extracted and must be separated
English only	Fee tables, some contracts, transaction descriptions	English recognition; many numbers that must stay visible
Names written in Arabic and in Latin letters	Forms, statements, payroll files	Both spellings must be linked to the same person
Arabic Indic and Western digits mixed; amounts in words	Hand filled forms, contracts, ID cards	Digits are converted to one form before checking; amounts written in words are also detected
Egyptian colloquial Arabic mixed with English words	Complaints, chats, call transcripts	Informal spelling; numbers broken up or written in words

Part 5. Sample collection and references

Collected public samples

All files are blank documents downloaded from the banks' own websites in October 2026. The Arabic share and text quality were measured on each file.

Document	Bank	Type	Pages	Language	Arabic share	Text quality	Form fields
Corporate client info form	Banque Misr	Account opening and customer identification (KYC) forms	1		0%	Clean text
